There are three kinds of corn.  
Each corn has its own seed.

Cow corn is for cows to eat.  
The kernel has a dip called a dent.  
The corn is cut when you see the  
dents.  
The corn is dry.

Popcorn is for people to eat.  
It has a round top on the kernel.  
It does not have a dent.  
It is dry.  
You pop it, to eat it.

Sweet corn is for people to eat.  
It does not have a dent.  
It is not dry.  
It is sweet and wet.

There are three kinds of corn.

There are three kinds of corn seed.
